

= Augustus =

Augustus (Latin : Imperator Caesar Divus Filius Augustus ; 23 September 63 BC ? 19 August 14 AD) was the founder of the Roman Empire and its first Emperor , ruling from 27 BC until his death in AD 14 .

He was born Gaius Octavius into an old and wealthy equestrian branch of the plebeian Octavii family . His maternal great @-@ uncle Julius Caesar was assassinated in 44 BC , and Octavius was named in Caesar 's will as his adopted son and heir , then known as Octavianus (Anglicized as Octavian) . He , Mark Antony , and Marcus Lepidus formed the Second Triumvirate to defeat the assassins of Caesar . Following their victory at Philippi , the Triumvirate divided the Roman Republic among themselves and ruled as military dictators . The Triumvirate was eventually torn apart under the competing ambitions of its members . Lepidus was driven into exile and stripped of his position , and Antony committed suicide following his defeat at the Battle of Actium by Octavian in 31 BC .

After the demise of the Second Triumvirate , Augustus restored the outward facade of the free Republic , with governmental power vested in the Roman Senate , the executive magistrates , and the legislative assemblies . In reality , however , he retained his autocratic power over the Republic as a military dictator . By law , Augustus held a collection of powers granted to him for life by the Senate , including supreme military command , and those of tribune and censor . It took several years for Augustus to develop the framework within which a formally republican state could be led under his sole rule . He rejected monarchical titles , and instead called himself Princeps Civitatis (" First Citizen of the State ") . The resulting constitutional framework became known as the Principate , the first phase of the Roman Empire .

The reign of Augustus initiated an era of relative peace known as the Pax Romana (The Roman Peace) . The Roman world was largely free from large @-@ scale conflict for more than two centuries , despite continuous wars of imperial expansion on the Empire 's frontiers and one year @-@ long civil war over the imperial succession . Augustus dramatically enlarged the Empire , annexing Egypt , Dalmatia , Pannonia , Noricum , and Raetia ; expanding possessions in Africa ; expanding into Germania ; and completing the conquest of Hispania .

Beyond the frontiers , he secured the Empire with a buffer region of client states and made peace with the Parthian Empire through diplomacy . He reformed the Roman system of taxation , developed networks of roads with an official courier system , established a standing army , established the Praetorian Guard , created official police and fire @-@ fighting services for Rome , and rebuilt much of the city during his reign .

Augustus died in AD 14 at the age of 75 . He may have died from natural causes , although there were unconfirmed rumors that his wife Livia poisoned him . He was succeeded as Emperor by his adopted son (also stepson and former son @-@ in @-@ law) Tiberius .

= = Name = =

Augustus (/ ?????st?s / ; Classical Latin : [aw????st?s]) was known by many names throughout his life :

At birth , he was named Gaius Octavius after his biological father . Historians typically refer to him simply as Octavius (or Octavian) between his birth in 63 until his adoption by Julius Caesar in 44 BC (after Julius Caesar 's death) .

Upon his adoption , he took Caesar 's name and became Gaius Julius Caesar Octavianus in accordance with Roman adoption naming standards . He quickly dropped " Octavianus " from his name , and his contemporaries typically referred to him as " Caesar " during this period ; historians , however , refer to him as Octavian between 44 BC and 27 BC .

In 42 BC , Octavian began the Temple of Divus Iulius or Temple of the Comet Star and added Divi Filius (Son of the Divine) to his name in order to strengthen his political ties to Caesar 's former soldiers by following the deification of Caesar , becoming Gaius Julius Caesar Divi Filius .

In 38 BC , Octavian replaced his praenomen " Gaius " and nomen " Julius " with Imperator , the title by which troops hailed their leader after military success , officially becoming Imperator Caesar Divi

Filius .

In 27 BC , following his defeat of Mark Antony and Cleopatra , the Roman Senate voted new titles for him , officially becoming Imperator Caesar Divi Filius Augustus . It is the events of 27 BC from which he obtained his traditional name of Augustus , which historians use in reference to him from 27 BC until his death in AD 14 .

= = Early life = =

While his paternal family was from the town of Velletri , approximately 40 kilometres (25 mi) from Rome , Augustus was born in the city of Rome on 23 September 63 BC . He was born at Ox Head , a small property on the Palatine Hill , very close to the Roman Forum . He was given the name Gaius Octavius Thurinus , his cognomen possibly commemorating his father 's victory at Thurii over a rebellious band of slaves .

Due to the crowded nature of Rome at the time , Octavius was taken to his father 's home village at Velletri to be raised . Octavius only mentions his father 's equestrian family briefly in his memoirs . His paternal great @-@ grandfather Gaius Octavius was a military tribune in Sicily during the Second Punic War . His grandfather had served in several local political offices . His father , also named Gaius Octavius , had been governor of Macedonia . His mother , Atia , was the niece of Julius Caesar .

In 59 BC , when he was four years old , his father died . His mother married a former governor of Syria , Lucius Marcius Philippus . Philippus claimed descent from Alexander the Great , and was elected consul in 56 BC . Philippus never had much of an interest in young Octavius . Because of this , Octavius was raised by his grandmother (and Julius Caesar 's sister) , Julia .

Julia died in 52 or 51 BC , and Octavius delivered the funeral oration for his grandmother . From this point , his mother and stepfather took a more active role in raising him . He donned the toga virilis four years later , and was elected to the College of Pontiffs in 47 BC . The following year he was put in charge of the Greek games that were staged in honor of the Temple of Venus Genetrix , built by Julius Caesar . According to Nicolaus of Damascus , Octavius wished to join Caesar 's staff for his campaign in Africa , but gave way when his mother protested . In 46 BC , she consented for him to join Caesar in Hispania , where he planned to fight the forces of Pompey , Caesar 's late enemy , but Octavius fell ill and was unable to travel .

When he had recovered , he sailed to the front , but was shipwrecked ; after coming ashore with a handful of companions , he crossed hostile territory to Caesar 's camp , which impressed his great @-@ uncle considerably . Velleius Paterculus reports that after that time , Caesar allowed the young man to share his carriage . When back in Rome , Caesar deposited a new will with the Vestal Virgins , naming Octavius as the prime beneficiary .

= = Rise to power = =

= = = Heir to Caesar = = =

Octavius was studying and undergoing military training in Apollonia , Illyria , when Julius Caesar was killed on the Ides of March (15 March) 44 BC . He rejected the advice of some army officers to take refuge with the troops in Macedonia and sailed to Italy to ascertain whether he had any potential political fortunes or security . Caesar had no living legitimate children under Roman law , and so had adopted Octavius , his grand @-@ nephew , making him his primary heir . Mark Antony later charged that Octavian had earned his adoption by Caesar through sexual favours , though Suetonius describes Antony 's accusation as political slander . After landing at Lupiae near Brundisium , Octavius learned the contents of Caesar 's will , and only then did he decide to become Caesar 's political heir as well as heir to two @-@ thirds of his estate .

Upon his adoption , Octavius assumed his great @-@ uncle 's name Gaius Julius Caesar . Roman citizens adopted into a new family usually retained their old nomen in cognomen form (e.g. ,

Octavianus for one who had been an Octavius , Aemilianus for one who had been an Aemilius , etc .) . However , though some of his contemporaries did , there is no evidence that Octavius ever himself officially used the name Octavianus , as it would have made his modest origins too obvious . Historians usually refer to the new Caesar as Octavian during the time between his adoption and his assumption of the name Augustus in 27 BC in order to avoid confusing the dead dictator with his heir .

Octavian could not rely on his limited funds to make a successful entry into the upper echelons of the Roman political hierarchy . After a warm welcome by Caesar 's soldiers at Brundisium , Octavian demanded a portion of the funds that were allotted by Caesar for the intended war against Parthia in the Middle East . This amounted to 700 million sesterces stored at Brundisium , the staging ground in Italy for military operations in the east .

A later senatorial investigation into the disappearance of the public funds took no action against Octavian , since he subsequently used that money to raise troops against the Senate 's arch enemy Mark Antony . Octavian made another bold move in 44 BC when , without official permission , he appropriated the annual tribute that had been sent from Rome 's Near Eastern province to Italy .

Octavian began to bolster his personal forces with Caesar 's veteran legionaries and with troops designated for the Parthian war , gathering support by emphasizing his status as heir to Caesar . On his march to Rome through Italy , Octavian 's presence and newly acquired funds attracted many , winning over Caesar 's former veterans stationed in Campania . By June , he had gathered an army of 3 @ , @ 000 loyal veterans , paying each a salary of 500 denarii .

= = = Growing tensions = = =

Arriving in Rome on 6 May 44 BC , Octavian found consul Mark Antony , Caesar 's former colleague , in an uneasy truce with the dictator 's assassins . They had been granted a general amnesty on 17 March , yet Antony succeeded in driving most of them out of Rome . This was due to his " inflammatory " eulogy given at Caesar 's funeral , mounting public opinion against the assassins .

Mark Antony was amassing political support , but Octavian still had opportunity to rival him as the leading member of the faction supporting Caesar . Mark Antony had lost the support of many Romans and supporters of Caesar when he initially opposed the motion to elevate Caesar to divine status . Octavian failed to persuade Antony to relinquish Caesar 's money to him . During the summer , he managed to win support from Caesarian sympathizers , however , who saw the younger heir as the lesser evil and hoped to manipulate him , or to bear with him during their efforts to get rid of Antony .

Octavian began to make common cause with the Optimates , the former enemies of Caesar . In September , the leading Optimate orator Marcus Tullius Cicero began to attack Antony in a series of speeches portraying him as a threat to the Republican order . With opinion in Rome turning against him and his year of consular power nearing its end , Antony attempted to pass laws that would lend him control over Cisalpine Gaul , which had been assigned as part of his province , from Decimus Junius Brutus Albinus , one of Caesar 's assassins .

Octavian meanwhile built up a private army in Italy by recruiting Caesarian veterans and , on 28 November , he won over two of Antony 's legions with the enticing offer of monetary gain . In the face of Octavian 's large and capable force , Antony saw the danger of staying in Rome and , to the relief of the Senate , he fled to Cisalpine Gaul , which was to be handed to him on 1 January .

= = = First conflict with Antony = = =

Decimus Brutus refused to give up Cisalpine Gaul , so Antony besieged him at Mutina . Antony rejected the resolutions passed by the Senate to stop the violence , as the Senate had no army of its own to challenge him . This provided an opportunity for Octavian , who already was known to have armed forces . Cicero also defended Octavian against Antony 's taunts about Octavian 's lack of noble lineage and aping of Julius Caesar 's name , stating " we have no more brilliant example of

traditional piety among our youth . "

At the urging of Cicero , the Senate inducted Octavian as senator on 1 January 43 BC , yet he also was given the power to vote alongside the former consuls . In addition , Octavian was granted *propraetor imperium* (commanding power) which legalized his command of troops , sending him to relieve the siege along with Hirtius and Pansa (the consuls for 43 BC) . In April 43 BC , Antony 's forces were defeated at the battles of Forum Gallorum and Mutina , forcing Antony to retreat to Transalpine Gaul . Both consuls were killed , however , leaving Octavian in sole command of their armies .

The senate heaped many more rewards on Decimus Brutus than on Octavian for defeating Antony , then attempted to give command of the consular legions to Decimus Brutus ? yet Octavian decided not to cooperate . Instead , Octavian stayed in the Po Valley and refused to aid any further offensive against Antony . In July , an embassy of centurions sent by Octavian entered Rome and demanded that he receive the consulship left vacant by Hirtius and Pansa .

Octavian also demanded that the decree should be rescinded which declared Antony a public enemy . When this was refused , he marched on the city with eight legions . He encountered no military opposition in Rome , and on 19 August 43 BC was elected consul with his relative Quintus Pedius as co - consul . Meanwhile , Antony formed an alliance with Marcus Aemilius Lepidus , another leading Caesarian .

== = Second Triumvirate == =

== = Proscriptions == =

In a meeting near Bologna in October 43 BC , Octavian , Antony , and Lepidus formed a junta called the Second Triumvirate . This explicit arrogation of special powers lasting five years was then supported by law passed by the plebs , unlike the unofficial First Triumvirate formed by Pompey , Julius Caesar , and Marcus Licinius Crassus . The triumvirs then set in motion proscriptions in which 300 senators and 2 , 000 equites allegedly were branded as outlaws and deprived of their property and , for those who failed to escape , their lives .

The estimation that 300 senators were proscribed was presented by Appian , although his earlier contemporary Livy asserted that only 130 senators had been proscribed . This decree issued by the triumvirate was motivated in part by a need to raise money to pay the salaries of their troops for the upcoming conflict against Caesar 's assassins , Marcus Junius Brutus and Gaius Cassius Longinus . Rewards for their arrest gave incentive for Romans to capture those proscribed , while the assets and properties of those arrested were seized by the triumvirs .

Contemporary Roman historians provide conflicting reports as to which triumvir was more responsible for the proscriptions and killing . However , the sources agree that enacting the proscriptions was a means by all three factions to eliminate political enemies . Marcus Velleius Paterculus asserted that Octavian tried to avoid proscribing officials whereas Lepidus and Antony were to blame for initiating them . Cassius Dio defended Octavian as trying to spare as many as possible , whereas Antony and Lepidus , being older and involved in politics longer , had many more enemies to deal with .

This claim was rejected by Appian , who maintained that Octavian shared an equal interest with Lepidus and Antony in eradicating his enemies . Suetonius presented the case that Octavian , although reluctant at first to proscribe officials , nonetheless pursued his enemies with more rigor than the other triumvirs . Plutarch described the proscriptions as a ruthless and cutthroat swapping of friends and family among Antony , Lepidus , and Octavian . For example , Octavian allowed the proscription of his ally Cicero , Antony the proscription of his maternal uncle Lucius Julius Caesar (the consul of 64 BC) , and Lepidus his brother Paullus .

== = Battle of Philippi and division of territory == =

On 1 January 42 BC , the Senate posthumously recognized Julius Caesar as a divinity of the Roman state , Divus Iulius . Octavian was able to further his cause by emphasizing the fact that he was Divi filius , " Son of God " . Antony and Octavian then sent 28 legions by sea to face the armies of Brutus and Cassius , who had built their base of power in Greece . After two battles at Philippi in Macedonia in October 42 , the Caesarian army was victorious and Brutus and Cassius committed suicide . Mark Antony later used the examples of these battles as a means to belittle Octavian , as both battles were decisively won with the use of Antony 's forces . In addition to claiming responsibility for both victories , Antony also branded Octavian as a coward for handing over his direct military control to Marcus Vipsanius Agrippa instead .

After Philippi , a new territorial arrangement was made among the members of the Second Triumvirate . Gaul and the provinces of Hispania and Italia were placed in the hands of Octavian . Antony traveled east to Egypt where he allied himself with Queen Cleopatra VII , the former lover of Julius Caesar and mother of Caesar 's infant son Caesarion . Lepidus was left with the province of Africa , stymied by Antony , who conceded Hispania to Octavian instead .

Octavian was left to decide where in Italy to settle the tens of thousands of veterans of the Macedonian campaign , whom the triumvirs had promised to discharge . The tens of thousands who had fought on the republican side with Brutus and Cassius could easily ally with a political opponent of Octavian if not appeased , and they also required land . There was no more government @-@ controlled land to allot as settlements for their soldiers , so Octavian had to choose one of two options : alienating many Roman citizens by confiscating their land , or alienating many Roman soldiers who could mount a considerable opposition against him in the Roman heartland . Octavian chose the former . There were as many as eighteen Roman towns affected by the new settlements , with entire populations driven out or at least given partial evictions .

= = = Rebellion and marriage alliances = = =

There was widespread dissatisfaction with Octavian over these settlements of his soldiers , and this encouraged many to rally at the side of Lucius Antonius , who was brother of Mark Antony and supported by a majority in the Senate . Meanwhile , Octavian asked for a divorce from Clodia Pulchra , the daughter of Fulvia (Mark Antony 's wife) and her first husband Publius Clodius Pulcher . He returned Clodia to her mother , claiming that their marriage had never been consummated . Fulvia decided to take action . Together with Lucius Antonius , she raised an army in Italy to fight for Antony 's rights against Octavian . Lucius and Fulvia took a political and martial gamble in opposing Octavian , however , since the Roman army still depended on the triumvirs for their salaries . Lucius and his allies ended up in a defensive siege at Perusia (modern Perugia) , where Octavian forced them into surrender in early 40 BC .

Lucius and his army were spared , due to his kinship with Antony , the strongman of the East , while Fulvia was exiled to Sicily . Octavian showed no mercy , however , for the mass of allies loyal to Lucius ; on 15 March , the anniversary of Julius Caesar 's assassination , he had 300 Roman senators and equestrians executed for allying with Lucius . Perusia also was pillaged and burned as a warning for others . This bloody event sullied Octavian 's reputation and was criticized by many , such as Augustan poet Sextus Propertius .

Sextus Pompeius was the son of First Triumvir Pompey and still a renegade general following Julius Caesar 's victory over his father . He was established in Sicily and Sardinia as part of an agreement reached with the Second Triumvirate in 39 BC . Both Antony and Octavian were vying for an alliance with Pompeius , who was a member of the republican party , ironically , not the Caesarian faction . Octavian succeeded in a temporary alliance in 40 BC when he married Scribonia , a daughter of Lucius Scribonius Libo who was a follower of Sextus Pompeius as well as his father @-@ in @-@ law . Scribonia gave birth to Octavian 's only natural child , Julia , who was born the same day that he divorced her to marry Livia Drusilla , little more than a year after their marriage .

While in Egypt , Antony had been engaged in an affair with Cleopatra and had fathered three children with her . Aware of his deteriorating relationship with Octavian , Antony left Cleopatra ; he sailed to Italy in 40 BC with a large force to oppose Octavian , laying siege to Brundisium . This new

conflict proved untenable for both Octavian and Antony , however . Their centurions , who had become important figures politically , refused to fight due to their Caesarian cause , while the legions under their command followed suit . Meanwhile , in Sicily , Antony 's wife Fulvia died of a sudden illness while Antony was en route to meet her . Fulvia 's death and the mutiny of their centurions allowed the two remaining triumvirs to effect a reconciliation .

In the autumn of 40 , Octavian and Antony approved the Treaty of Brundisium , by which Lepidus would remain in Africa , Antony in the East , Octavian in the West . The Italian peninsula was left open to all for the recruitment of soldiers , but in reality , this provision was useless for Antony in the East . To further cement relations of alliance with Mark Antony , Octavian gave his sister , Octavia Minor , in marriage to Antony in late 40 BC . During their marriage , Octavia gave birth to two daughters (known as Antonia Major and Antonia Minor) .

===== War with Pompeius =====

Sextus Pompeius threatened Octavian in Italy by denying shipments of grain through the Mediterranean to the peninsula . Pompeius ' own son was put in charge as naval commander in the effort to cause widespread famine in Italy . Pompeius ' control over the sea prompted him to take on the name Neptuni filius , " son of Neptune " . A temporary peace agreement was reached in 39 BC with the treaty of Misenum ; the blockade on Italy was lifted once Octavian granted Pompeius Sardinia , Corsica , Sicily , and the Peloponnese , and ensured him a future position as consul for 35 BC .

The territorial agreement between the triumvirate and Sextus Pompeius began to crumble once Octavian divorced Scribonia and married Livia on 17 January 38 BC . One of Pompeius ' naval commanders betrayed him and handed over Corsica and Sardinia to Octavian . Octavian lacked the resources to confront Pompeius alone , however , so an agreement was reached with the Second Triumvirate 's extension for another five @-@ year period beginning in 37 BC .

In supporting Octavian , Antony expected to gain support for his own campaign against Parthia , desiring to avenge Rome 's defeat at Carrhae in 53 BC . In an agreement reached at Tarentum , Antony provided 120 ships for Octavian to use against Pompeius , while Octavian was to send 20 @,@ 000 legionaries to Antony for use against Parthia . Octavian sent only a tenth of those promised , however , which Antony viewed as an intentional provocation .

Octavian and Lepidus launched a joint operation against Sextus in Sicily in 36 BC . Despite setbacks for Octavian , the naval fleet of Sextus Pompeius was almost entirely destroyed on 3 September by general Agrippa at the naval Battle of Naulochus . Sextus fled to the east with his remaining forces , where he was captured and executed in Miletus by one of Antony 's generals the following year . As Lepidus and Octavian accepted the surrender of Pompeius ' troops , Lepidus attempted to claim Sicily for himself , ordering Octavian to leave . Lepidus ' troops deserted him , however , and defected to Octavian since they were weary of fighting and were enticed by Octavian 's promises of money .

Lepidus surrendered to Octavian and was permitted to retain the office of pontifex maximus (head of the college of priests) , but was ejected from the Triumvirate , his public career at an end , and effectively was exiled to a villa at Cape Circei in Italy . The Roman dominions were now divided between Octavian in the West and Antony in the East . Octavian ensured Rome 's citizens of their rights to property in order to maintain peace and stability in his portion of the Empire . This time , he settled his discharged soldiers outside of Italy , while also returning 30 @,@ 000 slaves to their former Roman owners ? slaves who had fled to join Pompeius ' army and navy . Octavian had the Senate grant him , his wife , and his sister tribunal immunity , or sacrosanctitas , in order to ensure his own safety and that of Livia and Octavia once he returned to Rome .

===== War with Antony =====

Meanwhile , Antony 's campaign turned disastrous against Parthia , tarnishing his image as a leader , and the mere 2 @,@ 000 legionaries sent by Octavian to Antony were hardly enough to

replenish his forces . On the other hand , Cleopatra could restore his army to full strength ; he already was engaged in a romantic affair with her , so he decided to send Octavia back to Rome . Octavian used this to spread propaganda implying that Antony was becoming less than Roman because he rejected a legitimate Roman spouse for an " Oriental paramour " . In 36 BC , Octavian used a political ploy to make himself look less autocratic and Antony more the villain by proclaiming that the civil wars were coming to an end , and that he would step down as triumvir ? if only Antony would do the same . Antony refused .

Roman troops captured the Kingdom of Armenia in 34 BC , and Antony made his son Alexander Helios the ruler of Armenia . He also awarded the title " Queen of Kings " to Cleopatra , acts that Octavian used to convince the Roman Senate that Antony had ambitions to diminish the preeminence of Rome . Octavian became consul once again on 1 January 33 BC , and he opened the following session in the Senate with a vehement attack on Antony 's grants of titles and territories to his relatives and to his queen .

The breach between Antony and Octavian prompted a large portion of the Senators , as well as both of that year 's consuls , to leave Rome and defect to Antony . However , Octavian received two key deserters from Antony in the autumn of 32 BC : Munatius Plancus and Marcus Titius . These defectors gave Octavian the information that he needed to confirm with the Senate all the accusations that he made against Antony .

Octavian forcibly entered the temple of the Vestal Virgins and seized Antony 's secret will , which he promptly publicized . The will would have given away Roman @-@ conquered territories as kingdoms for his sons to rule , and designated Alexandria as the site for a tomb for him and his queen . In late 32 BC , the Senate officially revoked Antony 's powers as consul and declared war on Cleopatra 's regime in Egypt .

In early 31 BC , Antony and Cleopatra were temporarily stationed in Greece when Octavian gained a preliminary victory : the navy successfully ferried troops across the Adriatic Sea under the command of Agrippa . Agrippa cut off Antony and Cleopatra 's main force from their supply routes at sea , while Octavian landed on the mainland opposite the island of Corcyra (modern Corfu) and marched south . Trapped on land and sea , deserters of Antony 's army fled to Octavian 's side daily while Octavian 's forces were comfortable enough to make preparations .

Antony 's fleet sailed through the bay of Actium on the western coast of Greece in a desperate attempt to break free of the naval blockade . It was there that Antony 's fleet faced the much larger fleet of smaller , more maneuverable ships under commanders Agrippa and Gaius Sosius in the battle of Actium on 2 September 31 BC . Antony and his remaining forces were spared only due to a last @-@ ditch effort by Cleopatra 's fleet that had been waiting nearby .

Octavian pursued them and defeated their forces in Alexandria on 1 August 30 BC ? after which Antony and Cleopatra committed suicide . Antony fell on his own sword and was taken by his soldiers back to Alexandria where he died in Cleopatra 's arms . Cleopatra died soon after , reputedly by the venomous bite of an asp or by poison . Octavian had exploited his position as Caesar 's heir to further his own political career , and he was well aware of the dangers in allowing another person to do so the same . He , therefore , followed the advice of Arius Didymus that " two Caesars are one too many " , ordering Caesarion to be killed (Julius Caesar 's son by Cleopatra) , while sparing Cleopatra 's children by Antony , with the exception of Antony 's older son .

Octavian had previously shown little mercy to surrendered enemies and acted in ways that had proven unpopular with the Roman people , yet he was given credit for pardoning many of his opponents after the Battle of Actium .

= = Change to Augustus = =

After Actium and the defeat of Antony and Cleopatra , Octavian was in a position to rule the entire Republic under an unofficial principate ? but he had to achieve this through incremental power gains . He did so by courting the Senate and the people while upholding the republican traditions of Rome , appearing that he was not aspiring to dictatorship or monarchy . Marching into Rome , Octavian and Marcus Agrippa were elected as dual consuls by the Senate .

Years of civil war had left Rome in a state of near lawlessness , but the Republic was not prepared to accept the control of Octavian as a despot . At the same time , Octavian could not simply give up his authority without risking further civil wars among the Roman generals and , even if he desired no position of authority whatsoever , his position demanded that he look to the well @-@ being of the city of Rome and the Roman provinces . Octavian 's aims from this point forward were to return Rome to a state of stability , traditional legality , and civility by lifting the overt political pressure imposed on the courts of law and ensuring free elections ? in name at least .

= = = First settlement = = =

In 27 BC , Octavian made a show of returning full power to the Roman Senate and relinquishing his control of the Roman provinces and their armies . Under his consulship , however , the Senate had little power in initiating legislation by introducing bills for senatorial debate . Octavian was no longer in direct control of the provinces and their armies , but he retained the loyalty of active duty soldiers and veterans alike . The careers of many clients and adherents depended on his patronage , as his financial power was unrivaled in the Roman Republic . Historian Werner Eck states :

The sum of his power derived first of all from various powers of office delegated to him by the Senate and people , secondly from his immense private fortune , and thirdly from numerous patron @-@ client relationships he established with individuals and groups throughout the Empire . All of them taken together formed the basis of his auctoritas , which he himself emphasized as the foundation of his political actions .

To a large extent , the public were aware of the vast financial resources that Augustus commanded . He failed to encourage enough senators to finance the building and maintenance of networks of roads in Italy in 20 BC , but he undertook direct responsibility for them . This was publicized on the Roman currency issued in 16 BC , after he donated vast amounts of money to the aerarium Saturni , the public treasury .

According to H. H. Scullard , however , Augustus 's power was based on the exercise of " a predominant military power and ... the ultimate sanction of his authority was force , however much the fact was disguised . "

The Senate proposed to Octavian , the victor of Rome 's civil wars , that he once again assume command of the provinces . The Senate 's proposal was a ratification of Octavian 's extra @-@ constitutional power . Through the Senate , Octavian was able to continue the appearance of a still @-@ functional constitution . Feigning reluctance , he accepted a ten @-@ year responsibility of overseeing provinces that were considered chaotic .

The provinces ceded to him for that ten @-@ year period comprised much of the conquered Roman world , including all of Hispania and Gaul , Syria , Cilicia , Cyprus , and Egypt . Moreover , command of these provinces provided Octavian with control over the majority of Rome 's legions .

While Octavian acted as consul in Rome , he dispatched senators to the provinces under his command as his representatives to manage provincial affairs and ensure that his orders were carried out . The provinces not under Octavian 's control were overseen by governors chosen by the Roman Senate . Octavian became the most powerful political figure in the city of Rome and in most of its provinces , but he did not have sole monopoly on political and martial power .

The Senate still controlled North Africa , an important regional producer of grain , as well as Illyria and Macedonia , two martially strategic regions with several legions . However , the Senate had control of only five or six legions distributed among three senatorial proconsuls , compared to the twenty legions under the control of Augustus , and their control of these regions did not amount to any political or military challenge to Octavian .

The Senate 's control over some of the Roman provinces helped maintain a republican façade for the autocratic Principate . Also , Octavian 's control of entire provinces followed Republican @-@ era precedents for the objective of securing peace and creating stability , in which such prominent Romans as Pompey had been granted similar military powers in times of crisis and instability .

On 16 January 27 BC the Senate gave Octavian the new titles of Augustus and Princeps . Augustus is from the Latin word Augere (meaning to increase) and can be translated as " the

illustrious one " . It was a title of religious authority rather than political authority . According to Roman religious beliefs , the title symbolized a stamp of authority over humanity ? and in fact nature ? that went beyond any constitutional definition of his status . After the harsh methods employed in consolidating his control , the change in name served to demarcate his benign reign as Augustus from his reign of terror as Octavian .

His new title of Augustus was also more favorable than Romulus , the previous one which he styled for himself in reference to the story of Romulus and Remus (founders of Rome) , which symbolized a second founding of Rome . The title of Romulus was associated too strongly with notions of monarchy and kingship , an image that Octavian tried to avoid . Princeps comes from the Latin phrase *primum caput* , " the first head " , originally meaning the oldest or most distinguished senator whose name would appear first on the senatorial roster . In the case of Augustus , however , it became an almost regnal title for a leader who was first in charge . Princeps had also been a title under the Republic for those who had served the state well ; for example , Pompey had held the title .

Augustus also styled himself as *Imperator Caesar divi filius* , " Commander Caesar son of the deified one " . With this title , he boasted his familial link to deified Julius Caesar , and the use of *Imperator* signified a permanent link to the Roman tradition of victory . The word *Caesar* was merely a cognomen for one branch of the Julian family , yet Augustus transformed *Caesar* into a new family line that began with him .

Augustus was granted the right to hang the *corona civica* above his door , the " civic crown " made from oak , and to have laurels drape his doorposts . This crown was usually held above the head of a Roman general during a triumph , with the individual holding the crown charged to continually repeat to the general " *memento mori* " , or " Remember that you are mortal " . Additionally , laurel wreaths were important in several state ceremonies , and crowns of laurel were rewarded to champions of athletic , racing , and dramatic contests . Thus , both the laurel and the oak were integral symbols of Roman religion and statecraft ; placing them on Augustus ' doorposts was tantamount to declaring his home the capital .

However , Augustus renounced flaunting insignia of power such as holding a scepter , wearing a diadem , or wearing the golden crown and purple toga of his predecessor Julius Caesar . If he refused to symbolize his power by donning and bearing these items on his person , the Senate nonetheless awarded him with a golden shield displayed in the meeting hall of the Curia , bearing the inscription *virtus , pietas , clementia , iustitia* ? " valor , piety , clemency , and justice . "

== Second settlement ==

By 23 BC , some of the un @-@ Republican implications were becoming apparent concerning the settlement of 27 BC . Augustus ' policy of holding of an annual consulate drew attention to his dominance over the Roman political system , at the same time cutting in half the opportunities for others to achieve what was still purported to be the head of the Roman state . Further , he was causing political problems by desiring to have his nephew Marcus Claudius Marcellus follow in his footsteps and eventually assume the Principate in his turn , alienating his three biggest supporters ? Agrippa , Maecenas , and Livia . Feeling pressure from his own core group of adherents , Augustus turned to the Senate for help .

He appointed noted Republican Calpurnius Piso for co @-@ consul in 23 BC , after his choice Aulus Terentius Varro Murena was executed as part of the Marcus Primus Affair , in an attempt to bolster his support there , especially with the Republicans . (Murena had fought against Julius Caesar and supported Cassius and Brutus .)

In the late spring Augustus suffered a severe illness , and on his supposed deathbed made arrangements that would ensure the continuation of the Principate in some form , while at the same time put into doubt the senators ' suspicions of his anti @-@ republicanism . Augustus prepared to hand down his signet ring to his favored general Agrippa . However , Augustus handed over to his co @-@ consul Piso all of his official documents , an account of public finances , and authority over listed troops in the provinces while Augustus ' supposedly favored nephew Marcellus came away

empty @-@ handed . This was a surprise to many who believed Augustus would have named an heir to his position as an unofficial emperor .

Augustus bestowed only properties and possessions to his designated heirs , as an obvious system of institutionalized imperial inheritance would have provoked resistance and hostility among the republican @-@ minded Romans fearful of monarchy . With regards to the Principate , it was obvious to Augustus that Marcellus was not ready to take on his position ; nonetheless , by giving his signet ring to Agrippa , it was Augustus ' intent to signal to the legions that Agrippa was to be his successor , and that no matter what the constitutional rules were , they would continue to obey Agrippa .

Soon after his bout of illness subsided , Augustus gave up his annual consulship . The only other times Augustus would serve as consul would be in the years 5 and 2 BC , both times to introduce his grandsons into public life . This was a clever ploy by Augustus ; his ceasing to perennially be one of two annual consuls allowed aspiring senators a better chance to fill that position , while at the same time Augustus could exercise wider patronage within the senatorial class . Although Augustus had resigned as consul , he desired to retain his consular imperium not just in his provinces but throughout the empire . This desire , along with the Marcus Primus Affair , led to a second compromise between him and the Senate known as the Second Settlement .

= = = Primary reasons for the Second settlement = = =

The primary reasons for the Second Settlement were as follows . First , after Augustus relinquished the annual consulship , he was no longer in an official position to rule the state , yet his dominant position remained unchanged over his Roman , ' imperial ' provinces where he was still a proconsul . When he annually held the office of consul , he had the power to intervene with the affairs of the other provincial proconsuls appointed by the Senate throughout the empire , when he deemed necessary . When he relinquished his annual consulship , he legally lost this power because his proconsular powers applied only to his imperial provinces . Augustus wanted to keep this power .

A second problem later arose showing the need for the Second Settlement in what became known as the " Marcus Primus Affair " . In late 24 or early 23 BC , charges were brought against Marcus Primus , the former proconsul (governor) of Macedonia , for waging a war without prior approval of the Senate on the Odrysian kingdom of Thrace , whose king was a Roman ally . He was defended by Lucius Lucinius Varro Murena , who told the trial that his client had received specific instructions from Augustus , ordering him to attack the client state . Later , Primus testified that the orders came from the recently deceased Marcellus . Such orders , had they been given , would have been considered a breach of the Senate 's prerogative under the Constitutional settlement of 27 BC and its aftermath ? i.e. , before Augustus was granted imperium proconsulare maius ? as Macedonia was a Senatorial province under the Senate 's jurisdiction , not an imperial province under the authority of Augustus . Such an action would have ripped away the veneer of Republican restoration as promoted by Augustus , and exposed his fraud of merely being the first citizen , a first among equals . Even worse , the involvement of Marcellus provided some measure of proof that Augustus 's policy was to have the youth take his place as Princeps , instituting a form of monarchy ? accusations that had already played out .

The situation was so serious that Augustus himself appeared at the trial , even though he had not been called as a witness . Under oath , Augustus declared that he gave no such order . Murena disbelieved Augustus 's testimony and resented his attempt to subvert the trial by using his auctoritas . He rudely demanded to know why Augustus had turned up to a trial to which he had not been called ; Augustus replied that he came in the public interest . Although Primus was found guilty , some jurors voted to acquit , meaning that not everybody believed Augustus 's testimony , an insult to the ' August One ' .

The Second Constitutional Settlement was completed in part to allay confusion and formalize Augustus ' legal authority to intervene in Senatorial provinces . The Senate granted Augustus a form of general imperium proconsulare , or proconsular imperium (power) that applied throughout the empire , not solely to his provinces . Moreover , the Senate augmented Augustus ' proconsular

imperium into imperium proconsulare maius , or proconsular imperium applicable throughout the empire that was more (maius) or greater than that held by the other proconsuls . This in effect gave Augustus constitutional power superior to all other proconsuls in the empire . Augustus stayed in Rome during the renewal process and provided veterans with lavish donations to gain their support , thereby ensuring that his status of proconsular imperium maius was renewed in 13 BC .

= = = Additional powers = = =

During the second settlement , Augustus was also granted the power of a tribune (tribunicia potestas) for life , though not the official title of tribune . For some years , Augustus had been awarded tribunicia sacrosanctitas , the immunity given to a Tribune of the Plebeians . Now he decided to assume the full powers of the magistracy , renewed annually , in perpetuity . Legally , it was closed to patricians , a status that Augustus had acquired some years earlier when adopted by Julius Caesar . This power allowed him to convene the Senate and people at will and lay business before them , to veto the actions of either the Assembly or the Senate , to preside over elections , and to speak first at any meeting . Also included in Augustus ' tribunician authority were powers usually reserved for the Roman censor ; these included the right to supervise public morals and scrutinize laws to ensure that they were in the public interest , as well as the ability to hold a census and determine the membership of the Senate .

With the powers of a censor , Augustus appealed to virtues of Roman patriotism by banning all attire but the classic toga while entering the Forum . There was no precedent within the Roman system for combining the powers of the tribune and the censor into a single position , nor was Augustus ever elected to the office of censor . Julius Caesar had been granted similar powers , wherein he was charged with supervising the morals of the state . However , this position did not extend to the censor 's ability to hold a census and determine the Senate 's roster . The office of the tribunus plebis began to lose its prestige due to Augustus ' amassing of tribunal powers , so he revived its importance by making it a mandatory appointment for any plebeian desiring the praetorship .

Augustus was granted sole imperium within the city of Rome itself , in addition to being granted proconsular imperium maius and tribunician authority for life . Traditionally , proconsuls (Roman province governors) lost their proconsular " imperium " when they crossed the Pomerium ? the sacred boundary of Rome ? and entered the city . In these situations , Augustus would have power as part of his tribunician authority but his constitutional imperium within the Pomerium would be less than that of a serving consul . That would mean that , when he was in the city , he might not be the constitutional magistrate with the most authority . Thanks to his prestige or auctoritas , his wishes would usually be obeyed , but there might be some difficulty . To fill this power vacuum , the Senate voted that Augustus 's imperium proconsulare maius (superior proconsular power) should not lapse when he was inside the city walls . All armed forces in the city had formerly been under the control of the urban praetors and consuls , but this situation now placed them under the sole authority of Augustus .

In addition , the credit was given to Augustus for each subsequent Roman military victory after this time , because the majority of Rome 's armies were stationed in imperial provinces commanded by Augustus through the legatus who were deputies of the princeps in the provinces . Moreover , if a battle was fought in a Senatorial province , Augustus ' proconsular imperium maius allowed him to take command of (or credit for) any major military victory . This meant that Augustus was the only individual able to receive a triumph , a tradition that began with Romulus , Rome 's first King and first triumphant general . Lucius Cornelius Balbus was the last man outside Augustus ' family to receive this award in 19 BC . (Balbus was the nephew of Julius Caesar 's great agent , who was governor of Africa and conqueror of the Garamantes .) Tiberius , Augustus ' eldest son by marriage to Livia , was the only other general to receive a triumph ? for victories in Germania in 7 BC .

= = = Conspiracy = = =

Many of the political subtleties of the Second Settlement seem to have evaded the comprehension of the Plebeian class, who were Augustus' greatest supporters and clientele. This caused them to insist upon Augustus' participation in imperial affairs from time to time. Augustus failed to stand for election as consul in 22 BC, and fears arose once again that he was being forced from power by the aristocratic Senate. In 22, 21, and 19 BC, the people rioted in response, and only allowed a single consul to be elected for each of those years, ostensibly to leave the other position open for Augustus. Likewise, there was a food shortage in Rome in 22 BC which sparked panic, while many urban plebs called for Augustus to take on dictatorial powers to personally oversee the crisis. After a theatrical display of refusal before the Senate, Augustus finally accepted authority over Rome's grain supply "by virtue of his proconsular imperium", and ended the crisis almost immediately. It was not until AD 8 that a food crisis of this sort prompted Augustus to establish a praefectus annonae, a permanent prefect who was in charge of procuring food supplies for Rome.

Nevertheless, there were some who were concerned by the expansion of powers granted to Augustus by the Second Settlement, and this came to a head with the apparent conspiracy of Fannius Caepio. Some time prior to 1 September 22 BC, a certain Castricius provided Augustus with information about a conspiracy led by Fannius Caepio. Murena was named among the conspirators, the outspoken Consul who defended Primus in the Marcus Primus Affair. The conspirators were tried in absentia with Tiberius acting as prosecutor; the jury found them guilty, but it was not a unanimous verdict. All the accused were sentenced to death for treason and executed as soon as they were captured without ever giving testimony in their defence. Augustus ensured that the facade of Republican government continued with an effective cover-up of the events.

In 19 BC, the Senate granted Augustus a form of 'general consular imperium', which was probably 'imperium consulare maius', like the proconsular powers that he received in 23 BC. Like his tribune authority, the consular powers were another instance of gaining power from offices that he did not actually hold. In addition, Augustus was allowed to wear the consul's insignia in public and before the Senate, as well as to sit in the symbolic chair between the two consuls and hold the fasces, an emblem of consular authority. This seems to have assuaged the populace; regardless of whether or not Augustus was a consul, the importance was that he both appeared as one before the people and could exercise consular power if necessary. On 6 March 12 BC, after the death of Lepidus, he additionally took up the position of pontifex maximus, the high priest of the college of the Pontiffs, the most important position in Roman religion. On 5 February 2 BC, Augustus was also given the title pater patriae, or "father of the country".

== Stability and staying power ==

A final reason for the Second Settlement was to give the Principate constitutional stability and staying power in case something happened to Princeps Augustus. His illness of early 23 BC and the Caepio conspiracy showed that the regime's existence hung by the thin thread of the life of one man, Augustus himself, who suffered from several severe and dangerous illnesses throughout his life. If he were to die from natural causes or fall victim to assassination, Rome could be subjected to another round of civil war. The memories of Pharsalus, the Ides of March, the proscriptions, Philippi, and Actium, barely twenty to five years distant, were still vivid in the minds of many citizens. Proconsular imperium was conferred upon Agrippa for five years, similar to Augustus' power, in order to accomplish this constitutional stability. The exact nature of the grant is uncertain but it probably covered Augustus' imperial provinces, east and west, perhaps lacking authority over the provinces of the Senate. That came later, as did the jealously guarded tribunicia potestas.

Augustus' powers were now complete. In fact, he dated his 'reign' from the completion of the Second Settlement, July 1, 23 BC. Almost as importantly, the Principate now had constitutional stability. Later Roman Emperors were generally limited to the powers and titles originally granted to Augustus, though often newly appointed Emperors would decline one or more of the honorifics given to Augustus in order to display humility. Just as often, as their reign progressed, Emperors

would appropriate all of the titles , regardless of whether they had been granted them by the Senate . Later Emperors took to wearing the civic crown , consular insignia , and the purple robes of a Triumphant general (toga picta) , which became the imperial insignia well into the Byzantine era .

= = War and expansion = =

Imperator Caesar Divi Filius Augustus chose Imperator (" victorious commander ") to be his first name , since he wanted to make an emphatically clear connection between himself and the notion of victory . By the year 13 , Augustus boasted 21 occasions where his troops proclaimed " imperator " as his title after a successful battle . Almost the entire fourth chapter in his publicly released memoirs of achievements known as the Res Gestae was devoted to his military victories and honors .

Augustus also promoted the ideal of a superior Roman civilization with a task of ruling the world (to the extent to which the Romans knew it) , a sentiment embodied in words that the contemporary poet Virgil attributes to a legendary ancestor of Augustus : tu regere imperio populos , Romane , memento ? " Roman , remember by your strength to rule the Earth 's peoples ! " The impulse for expansionism apparently was prominent among all classes at Rome , and it is accorded divine sanction by Virgil 's Jupiter in Book 1 of the Aeneid , where Jupiter promises Rome imperium sine fine , " sovereignty without end " .

By the end of his reign , the armies of Augustus had conquered northern Hispania (modern Spain and Portugal) and the Alpine regions of Raetia and Noricum (modern Switzerland , Bavaria , Austria , Slovenia) , Illyricum and Pannonia (modern Albania , Croatia , Hungary , Serbia , etc .) , and had extended the borders of the Africa Province to the east and south .

Judea was added to the province of Syria when Augustus deposed Herod Archelaus , successor to client king Herod the Great (73 ? 4 BC) . Syria (like Egypt after Antony) was governed by a high prefect of the equestrian class rather than by a proconsul or legate of Augustus .

Again , no military effort was needed in 25 BC when Galatia (modern Turkey) was converted to a Roman province shortly after Amyntas of Galatia was killed by an avenging widow of a slain prince from Homonada . The rebellious tribes of Asturias and Cantabria in modern @-@ day Spain were finally quelled in 19 BC , and the territory fell under the provinces of Hispania and Lusitania . This region proved to be a major asset in funding Augustus ' future military campaigns , as it was rich in mineral deposits that could be fostered in Roman mining projects , especially the very rich gold deposits at Las Medulas .

Conquering the peoples of the Alps in 16 BC was another important victory for Rome , since it provided a large territorial buffer between the Roman citizens of Italy and Rome 's enemies in Germania to the north . Horace dedicated an ode to the victory , while the monument Trophy of Augustus near Monaco was built to honor the occasion . The capture of the Alpine region also served the next offensive in 12 BC , when Tiberius began the offensive against the Pannonian tribes of Illyricum , and his brother Nero Claudius Drusus moved against the Germanic tribes of the eastern Rhineland . Both campaigns were successful , as Drusus ' forces reached the Elbe River by 9 BC ? though he died shortly after by falling off his horse . It was recorded that the pious Tiberius walked in front of his brother 's body all the way back to Rome .

To protect Rome 's eastern territories from the Parthian Empire , Augustus relied on the client states of the east to act as territorial buffers and areas that could raise their own troops for defense . To ensure security of the Empire 's eastern flank , Augustus stationed a Roman army in Syria , while his skilled stepson Tiberius negotiated with the Parthians as Rome 's diplomat to the East . Tiberius was responsible for restoring Tigranes V to the throne of the Kingdom of Armenia .

Yet arguably his greatest diplomatic achievement was negotiating with Phraates IV of Parthia (37 ? 2 BC) in 20 BC for the return of the battle standards lost by Crassus in the Battle of Carrhae , a symbolic victory and great boost of morale for Rome . Werner Eck claims that this was a great disappointment for Romans seeking to avenge Crassus ' defeat by military means . However , Maria Brosius explains that Augustus used the return of the standards as propaganda symbolizing the submission of Parthia to Rome . The event was celebrated in art such as the breastplate design on

the statue Augustus of Prima Porta and in monuments such as the Temple of Mars Ultor (' Mars the Avenger ') built to house the standards .

Parthia had always posed a threat to Rome in the east , but the real battlefield was along the Rhine and Danube rivers . Before the final fight with Antony , Octavian 's campaigns against the tribes in Dalmatia were the first step in expanding Roman dominions to the Danube . Victory in battle was not always a permanent success , as newly conquered territories were constantly retaken by Rome 's enemies in Germania .

A prime example of Roman loss in battle was the Battle of Teutoburg Forest in AD 9 , where three entire legions led by Publius Quinctilius Varus were destroyed by Arminius , leader of the Cherusci , an apparent Roman ally . Augustus retaliated by dispatching Tiberius and Drusus to the Rhineland to pacify it , which had some success although the battle of AD 9 brought the end to Roman expansion into Germany . Roman general Germanicus took advantage of a Cherusci civil war between Arminius and Segestes ; they defeated Arminius , who fled that battle but was killed later in 21 due to treachery .

= = Death and succession = =

The illness of Augustus in 23 BC brought the problem of succession to the forefront of political issues and the public . To ensure stability , he needed to designate an heir to his unique position in Roman society and government . This was to be achieved in small , undramatic , and incremental ways that did not stir senatorial fears of monarchy . If someone was to succeed Augustus ' unofficial position of power , he would have to earn it through his own publicly proven merits .

Some Augustan historians argue that indications pointed toward his sister 's son Marcellus , who had been quickly married to Augustus ' daughter Julia the Elder . Other historians dispute this due to Augustus ' will read aloud to the Senate while he was seriously ill in 23 BC , instead indicating a preference for Marcus Agrippa , who was Augustus ' second in charge and arguably the only one of his associates who could have controlled the legions and held the Empire together .

After the death of Marcellus in 23 BC , Augustus married his daughter to Agrippa . This union produced five children , three sons and two daughters : Gaius Caesar , Lucius Caesar , Vipsania Julia , Agrippina the Elder , and Postumus Agrippa , so named because he was born after Marcus Agrippa died . Shortly after the Second Settlement , Agrippa was granted a five @-@ year term of administering the eastern half of the Empire with the imperium of a proconsul and the same tribunicia potestas granted to Augustus (although not trumping Augustus ' authority) , his seat of governance stationed at Samos in the eastern Aegean . This granting of power showed Augustus ' favor for Agrippa , but it was also a measure to please members of his Caesarian party by allowing one of their members to share a considerable amount of power with him .

Augustus ' intent became apparent to make Gaius and Lucius Caesar his heirs when he adopted them as his own children . He took the consulship in 5 and 2 BC so that he could personally usher them into their political careers , and they were nominated for the consulships of AD 1 and 4 . Augustus also showed favor to his stepsons , Livia 's children from her first marriage Nero Claudius Drusus Germanicus (henceforth referred to as Drusus) and Tiberius Claudius (henceforth Tiberius) , granting them military commands and public office , though seeming to favor Drusus . After Agrippa died in 12 BC , Tiberius was ordered to divorce his own wife Vipsania and marry Agrippa 's widow , Augustus ' daughter Julia ? as soon as a period of mourning for Agrippa had ended . Drusus ' marriage to Antonia was considered an unbreakable affair , whereas Vipsania was " only " the daughter of the late Agrippa from his first marriage .

Tiberius shared in Augustus ' tribune powers as of 6 BC , but shortly thereafter went into retirement , reportedly wanting no further role in politics while he exiled himself to Rhodes . No specific reason is known for his departure , though it could have been a combination of reasons , including a failing marriage with Julia , as well as a sense of envy and exclusion over Augustus ' apparent favouring of his young grandchildren @-@ turned @-@ sons Gaius and Lucius . (Gaius and Lucius joined the college of priests at an early age , were presented to spectators in a more favorable light , and were introduced to the army in Gaul .)

After the early deaths of both Lucius and Gaius in AD 2 and 4 respectively , and the earlier death of his brother Drusus (9 BC) , Tiberius was recalled to Rome in June AD 4 , where he was adopted by Augustus on the condition that he , in turn , adopt his nephew Germanicus . This continued the tradition of presenting at least two generations of heirs . In that year , Tiberius was also granted the powers of a tribune and proconsul , emissaries from foreign kings had to pay their respects to him , and by AD 13 was awarded with his second triumph and equal level of imperium with that of Augustus .

The only other possible claimant as heir was Postumus Agrippa , who had been exiled by Augustus in AD 7 , his banishment made permanent by senatorial decree , and Augustus officially disowned him . He certainly fell out of Augustus ' favor as an heir ; the historian Erich S. Gruen notes various contemporary sources that state Postumus Agrippa was a " vulgar young man , brutal and brutish , and of depraved character " . Postumus Agrippa was murdered at his place of exile either shortly before or after the death of Augustus .

On 19 August AD 14 , Augustus died while visiting Nola where his father had died . Both Tacitus and Cassius Dio wrote that Livia was rumored to have brought about Augustus ' death by poisoning fresh figs . This element features in many modern works of historical fiction pertaining to Augustus ' life , but some historians view it as likely to have been a salacious fabrication made by those who had favoured Postumus as heir , or other of Tiberius ' political enemies . Livia had long been the target of similar rumors of poisoning on the behalf of her son , most or all of which are unlikely to have been true .

Alternatively , it is possible that Livia did supply a poisoned fig (she did cultivate a variety of fig named for her that Augustus is said to have enjoyed) , but did so as a means of assisted suicide rather than murder . Augustus ' health had been in decline in the months immediately before his death , and he had made significant preparations for a smooth transition in power , having at last reluctantly settled on Tiberius as his choice of heir . It is likely that Augustus was not expected to return alive from Nola , but it seems that his health improved once there ; it has therefore been speculated that Augustus and Livia conspired to end his life at the anticipated time , having committed all political process to accepting Tiberius , in order to not endanger that transition .

Augustus ' famous last words were , " Have I played the part well ? Then applaud as I exit " ? referring to the play @-@ acting and regal authority that he had put on as emperor . Publicly , though , his last words were , " Behold , I found Rome of clay , and leave her to you of marble . " An enormous funerary procession of mourners traveled with Augustus ' body from Nola to Rome , and on the day of his burial all public and private businesses closed for the day . Tiberius and his son Drusus delivered the eulogy while standing atop two rostra . Augustus ' body was coffin @-@ bound and cremated on a pyre close to his mausoleum . It was proclaimed that Augustus joined the company of the gods as a member of the Roman pantheon . The mausoleum was despoiled by the Goths in 410 during the Sack of Rome , and his ashes were scattered .

Historian D. C. A. Shotter states that Augustus ' policy of favoring the Julian family line over the Claudian might have afforded Tiberius sufficient cause to show open disdain for Augustus after the latter 's death ; instead , Tiberius was always quick to rebuke those who criticized Augustus . Shotter suggests that Augustus ' deification obliged Tiberius to suppress any open resentment that he might have harbored , coupled with Tiberius ' " extremely conservative " attitude towards religion .

Also , historian R. Shaw @-@ Smith points to letters of Augustus to Tiberius which display affection towards Tiberius and high regard for his military merits . Shotter states that Tiberius focused his anger and criticism on Gaius Asinius Gallus (for marrying Vipsania after Augustus forced Tiberius to divorce her) , as well as toward the two young Caesars , Gaius and Lucius ? instead of Augustus , the real architect of his divorce and imperial demotion .

= = Legacy = =

Augustus ' reign laid the foundations of a regime that lasted , in one form or another , for nearly fifteen hundred years through the ultimate decline of the Western Roman Empire and until the Fall of Constantinople in 1453 . Both his adoptive surname , Caesar , and his title Augustus became the

permanent titles of the rulers of the Roman Empire for fourteen centuries after his death , in use both at Old Rome and at New Rome . In many languages , Caesar became the word for Emperor , as in the German Kaiser and in the Bulgarian and subsequently Russian Tsar . The cult of Divus Augustus continued until the state religion of the Empire was changed to Christianity in 391 by Theodosius I. Consequently , there are many excellent statues and busts of the first emperor . He had composed an account of his achievements , the *Res Gestae Divi Augusti* , to be inscribed in bronze in front of his mausoleum . Copies of the text were inscribed throughout the Empire upon his death . The inscriptions in Latin featured translations in Greek beside it , and were inscribed on many public edifices , such as the temple in Ankara dubbed the *Monumentum Ancyranum* , called the " queen of inscriptions " by historian Theodor Mommsen .

There are a few known written works by Augustus that have survived such as his poems *Sicily* , *Epiphanus* , and *Ajax* , an autobiography of 13 books , a philosophical treatise , and his written rebuttal to Brutus ' Eulogy of Cato . Historians are able to analyze existing letters penned by Augustus to others for additional facts or clues about his personal life .

Many consider Augustus to be Rome 's greatest emperor ; his policies certainly extended the Empire 's life span and initiated the celebrated *Pax Romana* or *Pax Augusta* . The Roman Senate wished subsequent emperors to " be more fortunate than Augustus and better than Trajan " . Augustus was intelligent , decisive , and a shrewd politician , but he was not perhaps as charismatic as Julius Caesar , and was influenced on occasion by his third wife , Livia (sometimes for the worse) . Nevertheless , his legacy proved more enduring . The city of Rome was utterly transformed under Augustus , with Rome 's first institutionalized police force , fire fighting force , and the establishment of the municipal prefect as a permanent office . The police force was divided into cohorts of 500 men each , while the units of firemen ranged from 500 to 1 @, @ 000 men each , with 7 units assigned to 14 divided city sectors .

A *praefectus vigilum* , or " Prefect of the Watch " was put in charge of the *vigiles* , Rome 's fire brigade and police . With Rome 's civil wars at an end , Augustus was also able to create a standing army for the Roman Empire , fixed at a size of 28 legions of about 170 @, @ 000 soldiers . This was supported by numerous auxiliary units of 500 soldiers each , often recruited from recently conquered areas .

With his finances securing the maintenance of roads throughout Italy , Augustus also installed an official courier system of relay stations overseen by a military officer known as the *praefectus vehiculorum* . Besides the advent of swifter communication among Italian polities , his extensive building of roads throughout Italy also allowed Rome 's armies to march swiftly and at an unprecedented pace across the country . In the year 6 Augustus established the *aerarium militare* , donating 170 million sesterces to the new military treasury that provided for both active and retired soldiers .

One of the most enduring institutions of Augustus was the establishment of the *Praetorian Guard* in 27 BC , originally a personal bodyguard unit on the battlefield that evolved into an imperial guard as well as an important political force in Rome . They had the power to intimidate the Senate , install new emperors , and depose ones they disliked ; the last emperor they served was Maxentius , as it was Constantine I who disbanded them in the early 4th century and destroyed their barracks , the *Castra Praetoria* .

Although the most powerful individual in the Roman Empire , Augustus wished to embody the spirit of Republican virtue and norms . He also wanted to relate to and connect with the concerns of the plebs and lay people . He achieved this through various means of generosity and a cutting back of lavish excess . In the year 29 BC , Augustus paid 400 sesterces each to 250 @, @ 000 citizens , 1 @, @ 000 sesterces each to 120 @, @ 000 veterans in the colonies , and spent 700 million sesterces in purchasing land for his soldiers to settle upon . He also restored 82 different temples to display his care for the Roman pantheon of deities . In 28 BC , he melted down 80 silver statues erected in his likeness and in honor of him , an attempt of his to appear frugal and modest .

The longevity of Augustus ' reign and its legacy to the Roman world should not be overlooked as a key factor in its success . As Tacitus wrote , the younger generations alive in AD 14 had never known any form of government other than the Principate . Had Augustus died earlier (in 23 BC , for

instance) , matters might have turned out differently . The attrition of the civil wars on the old Republican oligarchy and the longevity of Augustus , therefore , must be seen as major contributing factors in the transformation of the Roman state into a de facto monarchy in these years . Augustus ' own experience , his patience , his tact , and his political acumen also played their parts . He directed the future of the Empire down many lasting paths , from the existence of a standing professional army stationed at or near the frontiers , to the dynastic principle so often employed in the imperial succession , to the embellishment of the capital at the emperor 's expense . Augustus ' ultimate legacy was the peace and prosperity the Empire enjoyed for the next two centuries under the system he initiated . His memory was enshrined in the political ethos of the Imperial age as a paradigm of the good emperor . Every Emperor of Rome adopted his name , Caesar Augustus , which gradually lost its character as a name and eventually became a title . The Augustan era poets Virgil and Horace praised Augustus as a defender of Rome , an upholder of moral justice , and an individual who bore the brunt of responsibility in maintaining the empire .

However , for his rule of Rome and establishing the principate , Augustus has also been subjected to criticism throughout the ages . The contemporary Roman jurist Marcus Antistius Labeo (d . AD 10 / 11) , fond of the days of pre -@-@ Augustan republican liberty in which he had been born , openly criticized the Augustan regime . In the beginning of his Annals , the Roman historian Tacitus (c . 56 ? c.117) wrote that Augustus had cunningly subverted Republican Rome into a position of slavery . He continued to say that , with Augustus ' death and swearing of loyalty to Tiberius , the people of Rome simply traded one slaveholder for another . Tacitus , however , records two contradictory but common views of Augustus :

Intelligent people praised or criticized him in varying ways . One opinion was as follows . Filial duty and a national emergency , in which there was no place for law @-@ abiding conduct , had driven him to civil war ? and this can neither be initiated nor maintained by decent methods . He had made many concessions to Anthony and to Lepidus for the sake of vengeance on his father 's murderers . When Lepidus grew old and lazy , and Anthony 's self @-@ indulgence got the better of him , the only possible cure for the distracted country had been government by one man . However , Augustus had put the state in order not by making himself king or dictator , but by creating the Principate . The Empire 's frontiers were on the ocean , or distant rivers . Armies , provinces , fleets , the whole system was interrelated . Roman citizens were protected by the law . Provincials were decently treated . Rome itself had been lavishly beautified . Force had been sparingly used ? merely to preserve peace for the majority .

According to the second opposing opinion :

filial duty and national crisis had been merely pretexts . In actual fact , the motive of Octavian , the future Augustus , was lust for power ... There had certainly been peace , but it was a blood @-@ stained peace of disasters and assassinations .

In a recent biography on Augustus , Anthony Everitt asserts that through the centuries , judgments on Augustus ' reign have oscillated between these two extremes but stresses that :

" Opposites do not have to be mutually exclusive , and we are not obliged to choose one or the other . The story of his career shows that Augustus was indeed ruthless , cruel , and ambitious for himself . This was only in part a personal trait , for upper @-@ class Romans were educated to compete with one another and to excel . However , he combined an overriding concern for his personal interests with a deep @-@ seated patriotism , based on a nostalgia of Rome 's antique virtues . In his capacity as princeps , selfishness and selflessness coexisted in his mind . While fighting for dominance , he paid little attention to legality or to the normal civilities of political life . He was devious , untrustworthy , and bloodthirsty . But once he had established his authority , he governed efficiently and justly , generally allowed freedom of speech , and promoted the rule of law . He was immensely hardworking and tried as hard as any democratic parliamentarian to treat his senatorial colleagues with respect and sensitivity . He suffered from no delusions of grandeur . "

Tacitus was of the belief that Nerva (r . 96 ? 98) successfully " mingled two formerly alien ideas , principate and liberty " . The 3rd @-@ century historian Cassius Dio acknowledged Augustus as a benign , moderate ruler , yet like most other historians after the death of Augustus , Dio viewed Augustus as an autocrat . The poet Marcus Annaeus Lucanus (AD 39 ? 65) was of the opinion that

Caesar 's victory over Pompey and the fall of Cato the Younger (95 BC ? 46 BC) marked the end of traditional liberty in Rome ; historian Chester G. Starr , Jr. writes of his avoidance of criticizing Augustus , " perhaps Augustus was too sacred a figure to accuse directly . "

The Anglo @-@ Irish writer Jonathan Swift (1667 ? 1745) , in his Discourse on the Contests and Dissentions in Athens and Rome , criticized Augustus for installing tyranny over Rome , and likened what he believed Great Britain 's virtuous constitutional monarchy to Rome 's moral Republic of the 2nd century BC . In his criticism of Augustus , the admiral and historian Thomas Gordon (1658 ? 1741) compared Augustus to the puritanical tyrant Oliver Cromwell (1599 ? 1658) . Thomas Gordon and the French political philosopher Montesquieu (1689 ? 1755) both remarked that Augustus was a coward in battle . In his Memoirs of the Court of Augustus , the Scottish scholar Thomas Blackwell (1701 ? 1757) deemed Augustus a Machiavellian ruler , " a bloodthirsty vindictive usurper " , " wicked and worthless " , " a mean spirit " , and a " tyrant " .

= = = Revenue reforms = = =

Augustus ' public revenue reforms had a great impact on the subsequent success of the Empire . Augustus brought a far greater portion of the Empire 's expanded land base under consistent , direct taxation from Rome , instead of exacting varying , intermittent , and somewhat arbitrary tributes from each local province as Augustus ' predecessors had done . This reform greatly increased Rome 's net revenue from its territorial acquisitions , stabilized its flow , and regularized the financial relationship between Rome and the provinces , rather than provoking fresh resentments with each new arbitrary exaction of tribute .

The measures of taxation in the reign of Augustus were determined by population census , with fixed quotas for each province . Citizens of Rome and Italy paid indirect taxes , while direct taxes were exacted from the provinces . Indirect taxes included a 4 % tax on the price of slaves , a 1 % tax on goods sold at auction , and a 5 % tax on the inheritance of estates valued at over 100 @,@ 000 sesterces by persons other than the next of kin .

An equally important reform was the abolition of private tax farming , which was replaced by salaried civil service tax collectors . Private contractors that raised taxes had been the norm in the Republican era , and some had grown powerful enough to influence the amount of votes for politicians in Rome . The tax farmers had gained great infamy for their depredations , as well as great private wealth , by winning the right to tax local areas .

Rome 's revenue was the amount of the successful bids , and the tax farmers ' profits consisted of any additional amounts they could forcibly wring from the populace with Rome 's blessing . Lack of effective supervision , combined with tax farmers ' desire to maximize their profits , had produced a system of arbitrary exactions that was often barbarously cruel to taxpayers , widely (and accurately) perceived as unfair , and very harmful to investment and the economy .

The use of Egypt 's immense land rents to finance the Empire 's operations resulted from Augustus ' conquest of Egypt and the shift to a Roman form of government . As it was effectively considered Augustus ' private property rather than a province of the Empire , it became part of each succeeding emperor 's patrimonium . Instead of a legate or proconsul , Augustus installed a prefect from the equestrian class to administer Egypt and maintain its lucrative seaports ; this position became the highest political achievement for any equestrian besides becoming Prefect of the Praetorian Guard . The highly productive agricultural land of Egypt yielded enormous revenues that were available to Augustus and his successors to pay for public works and military expeditions , as well as bread and circuses for the population of Rome .

During his reign the circus games resulted in the murder of 3 @,@ 500 elephants .

= = = Month of August = = =

The month of August (Latin : Augustus) is named after Augustus ; until his time it was called Sextilis (named so because it had been the sixth month of the original Roman calendar and the Latin word for six is sex) . Commonly repeated lore has it that August has 31 days because

Augustus wanted his month to match the length of Julius Caesar 's July , but this is an invention of the 13th century scholar Johannes de Sacrobosco . Sextilis in fact had 31 days before it was renamed , and it was not chosen for its length (see Julian calendar) . According to a senatus consultum quoted by Macrobius , Sextilis was renamed to honor Augustus because several of the most significant events in his rise to power , culminating in the fall of Alexandria , fell in that month .

= = = Building projects = = =

On his deathbed , Augustus boasted " I found a Rome of bricks ; I leave to you one of marble . " Although there is some truth in the literal meaning of this , Cassius Dio asserts that it was a metaphor for the Empire 's strength . Marble could be found in buildings of Rome before Augustus , but it was not extensively used as a building material until the reign of Augustus .

Although this did not apply to the Subura slums , which were still as rickety and fire @-@ prone as ever , he did leave a mark on the monumental topography of the centre and of the Campus Martius , with the Ara Pacis (Altar of Peace) and monumental sundial , whose central gnomon was an obelisk taken from Egypt . The relief sculptures decorating the Ara Pacis visually augmented the written record of Augustus ' triumphs in the Res Gestae . Its reliefs depicted the imperial pageants of the praetorians , the Vestals , and the citizenry of Rome .

He also built the Temple of Caesar , the Baths of Agrippa , and the Forum of Augustus with its Temple of Mars Ultor . Other projects were either encouraged by him , such as the Theatre of Balbus , and Agrippa 's construction of the Pantheon , or funded by him in the name of others , often relations (e.g. Portico of Octavia , Theatre of Marcellus) . Even his Mausoleum of Augustus was built before his death to house members of his family .

To celebrate his victory at the Battle of Actium , the Arch of Augustus was built in 29 BC near the entrance of the Temple of Castor and Pollux , and widened in 19 BC to include a triple @-@ arch design . There are also many buildings outside of the city of Rome that bear Augustus ' name and legacy , such as the Theatre of Mérida in modern Spain , the Maison Carrée built at Nîmes in today 's southern France , as well as the Trophy of Augustus at La Turbie , located near Monaco .

After the death of Agrippa in 12 BC , a solution had to be found in maintaining Rome 's water supply system . This came about because it was overseen by Agrippa when he served as aedile , and was even funded by him afterwards when he was a private citizen paying at his own expense . In that year , Augustus arranged a system where the Senate designated three of its members as prime commissioners in charge of the water supply and to ensure that Rome 's aqueducts did not fall into disrepair .

In the late Augustan era , the commission of five senators called the *curatores locorum publicorum iudicandorum* (translated as " Supervisors of Public Property ") was put in charge of maintaining public buildings and temples of the state cult . Augustus created the senatorial group of the *curatores viarum* (translated as " Supervisors for Roads ") for the upkeep of roads ; this senatorial commission worked with local officials and contractors to organize regular repairs .

The Corinthian order of architectural style originating from ancient Greece was the dominant architectural style in the age of Augustus and the imperial phase of Rome . Suetonius once commented that Rome was unworthy of its status as an imperial capital , yet Augustus and Agrippa set out to dismantle this sentiment by transforming the appearance of Rome upon the classical Greek model .

= = Physical appearance and official images = =

His biographer Suetonius , writing about a century after Augustus ' death , described his appearance as : " ... unusually handsome and exceedingly graceful at all periods of his life , though he cared nothing for personal adornment . He was so far from being particular about the dressing of his hair , that he would have several barbers working in a hurry at the same time , and as for his beard he now had it clipped and now shaved , while at the very same time he would either be reading or writing something ... He had clear , bright eyes ... His teeth were wide apart , small , and

ill @-@ kept ; his hair was slightly curly and inclining to golden ; his eyebrows met . His ears were of moderate size , and his nose projected a little at the top and then bent ever so slightly inward . His complexion was between dark and fair . He was short of stature (although Julius Marathus , his freedman and keeper of his records , says that he was five feet and nine inches , more or less 1 @.@ 75 meter , in height) , but this was concealed by the fine proportion and symmetry of his figure , and was noticeable only by comparison with some taller person standing beside him "

His official images were very tightly controlled and idealized , drawing from a tradition of Hellenistic royal portraiture rather than the tradition of realism in Roman portraiture . He first appeared on coins at the age of 19 , and from about 29 BC " the explosion in the number of Augustan portraits attests a concerted propaganda campaign aimed at dominating all aspects of civil , religious , economic and military life with Augustus ' person . " The early images did indeed depict a young man , but although there were gradual changes his images remained youthful until he died in his seventies , by which time they had " a distanced air of ageless majesty " . Among the best known of many surviving portraits are the Augustus of Prima Porta , the image on the Ara Pacis , and the Via Labicana Augustus , which shows him as a priest . Several cameo portraits include the Blacas Cameo and Gemma Augustea .
