

= Pennsylvania Route 237 =

Pennsylvania Route 237 was an 3 @. @ 88 @- @ mile (6 @. @ 24 km) route between State Route 37 and State Route 590 in Lackawaxen to an intersection with State Route 137 (now State Route 434) in Shohola Township . The route followed the shores of the Delaware River as Lackawaxen Road . The route 's alignment , after assignment in 1928 , remained the same until being removed from the state highway system in 1946 . The route was paved in 1932 , and the route is now known as State Route 1012 and Shohola Township Roads 413 and 454 .

= = Route description = =

The alignment of State Route 237 began at an intersection with its parent highway , State Route 37 in Lackawaxen Township , near Roebling 's Delaware Aqueduct . This is currently the intersection with State Route 590 . The highway heads eastward along the banks of the Delaware River and a nearby railroad track towards Shohola Township . There is an intersection with Delaware Drive just after the inception . Delaware Drive heads to a dead @- @ end at the banks of the Delaware River . The highway passes some homes to the north and a dense forest to the south . There is also a mansion atop a nearby hill . After a clearing , the highway enters the dense forest completely and turns to the southeast .

With the train tracks , Delaware River and New York State Route 97 paralleling to the north , the highway begins a southeastern track . There are some occasional clearings , The old alignment of State Route 237 passes a pond as the highway pulls away from the river and train tracks with the forests becoming a majority the surroundings . The old alignment of State Route 237 passes a pond , as the highway pulls away from the river and train tracks . The highway intersects with Township Road 413 , which serves access to Hirsh Pond , located to the north . The route begins to head through larger clearings as it continues southeast . At an intersection with German Hill Road , the highway makes a shot to the east , passing through some woods . After the woods , the old alignment of State Route 237 ends at an intersection with State Route 434 . This was once an intersection with State Route 137 .

= = History = =

State Route 237 was assigned in 1928 , during the mass numbering of state highways within Pennsylvania . The termini at the time were with State Route 37 and State Route 137 , the former of which was the parent route . At the time , the entire highway was an unimproved gravel road . This lasted for four years , until 1932 , when the Pennsylvania Department of Highways paved the highway . The highway remained relatively unchanged until 1946 , when the highway was decommissioned in a mass deletion of state highways within the commonwealth . The current alignment of former State Route 237 is now Pike County Quadrant Route 1012 from PA 590 to the Shohola Township border . The rest is locally maintained , with a piece at PA 434 designated Shohola Township Roads 413 and 454 . The two state routes at the termini , State Routes 37 and 137 , are now State Routes 434 and 590 .

= = Major intersections = =

The entire route was in Pike County .
